

## OUR STORY

Peg Bascom's personal cannabis journey began in 2016 when she was given CBD oil for her husband, who suffers from Parkinson's disease. After using the CBD oil for 30 days, her husband's uncontrollable movements (dyskinesia) and tremors were completely under control. *He has continued his use of the CBD oil and the dyskinesia has never returned.*

Peg conceived of Cannabis Wellness Tours with an eye towards educating individuals on the many health benefits of cannabis. She's aware of the many misconceptions about cannabis and how difficult it is to find information about the many ways it can help with a multitude of issues.

The senior population is especially underserved in terms of utilizing the available cannabis products that can provide real relief. Add to that the stigma of using cannabis, plus the confusing and overwhelming choices confronting you in a dispensary, and it becomes extremely difficult to make an informed decision about any cannabis purchase.

This is *not the "party bus" experience* that you find on other tours. We will not be partaking of any cannabis on the tour. This is a sincere effort to provide an education into the multitude of ways that cannabis can provide relief for a variety of health issues, both physical and mental.

*Our goal is to provide our customers with the tools they need to make informed decisions about cannabis consumption.* Cannabis Wellness Tours will provide an overview of cannabis terms, and introduce you to the different types and strains of cannabis. We'll discuss the many types of consumption, and explore potential health benefits, so that your next visit to a dispensary will be a great experience. And, you'll leave feeling confident that you've made the right choice for your needs!

## OUR MISSION

To educate the public on the science of the human endocannabinoid system, introduce knowledge about potential health benefits of cannabis, explore different types of consumption methods, and help remove the stigma associated with cannabis.
